NEW FACILITY SEEKING EDUCATORS!

Our brand new child care centre is looking for amazing educators! With experienced educators on the founding team, we have collaboratively designed a facility to incorporate all the elements that would make the best place to work and the best environment for growth. The building features stunning natural light with wraparound solarium windows as we intently pursue a philosophy to synergize with nature. We are confident in impressing you with a marvelous feature-packed facility.

We are built on the belief of empowering educators to be focused exclusively on connecting with children rather than administrative and remedial tasks. This is why we are stripping away and keeping to an absolute minimum any non-care related work. We genuinely care about educators as we also believe in career progression and reimbursing expenses so that program supplies will never have to be out-of-pocket.

Organic Early Learning is launching an innovative approach to child care, where parents, children, and educators are intimately connected as a Wholehearted Family™. We treat every child as if they are our own and we provide an environment that thrives on uniqueness and diversity. We believe in planting the seeds for wholesome growth because we are nurturing the roots of the world's future. We genuinely hope to share our passion with you and show you how we see child care very differently.
